COUNCIL OFFICES  
SAWBRIDGEWORTH

EAST HERTFORDSHIRE COMBINED DISTRICTS  
REPORT OF THE MEDICAL OFFICER OF HEALTH  
FOR THE YEAR 1966  
SAWBRIDGEWORTH URBAN DISTRICT

PREFACE

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report upon the health of the Urban District of Sawbridgeworth for the year 1966.

The health of the population could scarcely have been better which largely explains the brevity of the report. For example, there were only 16 cases of infectious diseases, of which 15 were Measles.

The population figure showed an upward swing from 5,020 to 5,140, an increase of 120 from the 1965 figure of 70. There was a small increase of 2 in the number of live births while the deaths rose from 41 to 51. There were again no maternal deaths.

The temporary sewage scheme, referred to in last years preface, did not in fact come into being during 1966 but it was anticipated that it would start operation early in 1967. In consequence, a considerable increase in building took place during the latter part of 1966 and it is expected that this will be reflected in the population figures for 1967. During 1966 the permanent scheme was in cause of preparation by the Council's Consultatives.

I am again indebted to the Council and the Public Health Committee and their Chairman for their continued interest in all aspects of the health of the Community.

In particular I am most grateful to Mr. Ford and his staff upon whose unfailing assistance I constantly rely. I wish also to thank the other Chief Officers for their co-operation.

I am,  
Mr. Chairman, Ladies and Gentlemen,  
Your obedient Servant.

Gordon M. Frizelle.

## GENERAL STATISTICS

The mid-year population of the Urban District rose in 1966 from 5020 to 5140, this being an increase of 120 compared with the figure of 5020 in 1965. This 120 was made up of a natural increase of 29 and an inward migration of 91.

The number of inhabited houses rose from 1751 to 1785, the number of houses per acre remained at 0.66, the number of persons per house increased from 2.86 to 2.87 and the number of persons per acre from 1.85 to 1.92.

## VITAL STATISTICS

The total number of live births rose by 2, from 78 to 80, while the still births fell from 2 to 0. There was an increase in infant deaths from 2 to 4. Once again there were no maternal deaths, while the deaths at all ages rose from 41 to 51.

## CAUSES OF DEATH

The chief cause of death was heart disease which were responsible for 18 cases of which 12 were due to Coronary disease. The second commonest cause was malignant disease which accounted for 12 deaths, 2 being due to cancer of the lung and 1 due to leukaemia, vascular lesions of the nervous system caused 5 deaths of which 4 were over the age of 65.

There were 2 deaths due to motor vehicle accidents and 1 death due to narcotic poisoning. The 4 deaths in infants under 1 year of age were caused by prematurity and congenital abnormalities. Out of the total of 51 deaths, 19 occurred over the age of 75.

## INFECTIOUS DISEASES.

There was a remarkably small incidence of infectious disease, only 15 cases of measles being reported and 1 of infectious hepatitis.

## TUBERCULOSIS

The cases of tuberculosis rose from 21 to 25 of which 3 were non-pulmonary.

## MASS RADIOGRAPHY

By special arrangement the mass x-ray Unit visited Sawbridgeworth on 22nd and 23rd September, concentrating largely upon evening sessions from 5.0 - 7.30 p.m. Although the response from the larger factories were disappointing, a total of 426 persons attended. Only 1 case of tuberculosis requiring treatment was discovered. Other chest abnormalities numbered 6.

## FOOD HYGIENE

A customer reported finding two beetles inside the wrapper of a loaf of bread which was purchased in Sawbridgeworth. No evidence of beetle infestation was found either in the local shop or in the supplying bakery in Tottenham. As the evidence and information were inconclusive no action was taken but the shop and the bakery were both warned of the gravity of the occurrence.

Again, a wrapped pork pie bought locally was found to be affected by mould. It was discovered that the Shop Keeper had not sold his pies in strict rotation. In view of various circumstances no action was taken by the Public Health Committee and the owner gave his assurance of strict control in the storage and distribution of food.

Apart from these small incidents there were no infringements of the Food Hygiene Regulations neither were there any reported case of food poisoning.

## NATIONAL ASSISTANCE ACTS, 1948 - 1951.

No action was required under Section 47 of these Acts.

## REPORTS

During the year special reports were made to the Public Health Committee on the Food Hygiene (Markets, Stalls and Delivery Vehicles) Regulations, 1966, on Brucellosis in the United Kingdom, on the possible future of Mass Radiography and on the Annual Conference of the Royal Institute of Public Health and Hygiene held at Scarborough.

### Hospital Services.

Sawbridgeworth is served chiefly by the Herts and Essex General Hospital and by the Bishop's Stortford and District Hospital.

These Hospitals are managed by the Hertford Group Hospital Management Committee, within the North East Metropolitan Regional Hospital Board.

### General Practitioner Medical Services.

Three General Practitioners reside and practise in Sawbridgeworth but the Town is also served by Practitioners in the Harlow (Essex) and Bishop's Stortford localities.

### Dental Service.

Dental Practitioners are available in adjoining towns.

### Old People's Welfare Association.

This body is very active in Sawbridgeworth and in addition to its other functions, has for a number of years been responsible for a much needed Chiropody Service.

The Woman's Voluntary Service provides meals on wheels for Sawbridgeworth and adjacent areas.

### Other Services

There is a Mortuary owned and managed by the Urban District Council. Blood Transfusion Donor Sessions are held at the Memorial Hall.

## S E C T I O N   C

### SANITARY CIRCUMSTANCES OF THE AREA

#### WATER SUPPLY

The piped supply is provided by the Lee Valley Water Company to 1849 premises.

88 premises in the District, including new houses were connected to the mains during the year, leaving four dwellings in Spellbrook which are supplied from privately owned wells.

The water supply to the district has been regularly sampled throughout the year and submitted for analysis. 194 samples were sent for analysis for bacteriological examination. 12 water samples were sent to the Laboratory for chemical analysis and the reports showed that all samples conformed to Standards of purity suitable for public supply.

#### DRAINAGE, SEWERAGE AND SEWAGE DISPOSAL

Most of the District is served by main drainage. Sewage is disposed of at two sewage works. The effluent at the principal works is discharged into the River Stort after purification and in the case of the other (smaller) works, it is disposed of by septic tank treatment followed by land irrigation.

Three out of ten samples of effluent taken from the Sewage Works for analysis were satisfactory upon analysis. Seven samples were high in suspended matter, and B.O.D. content.

The Lee Conservancy Catchment Board are most concerned about the standard of final effluent and the Council are making every effort to expedite the connection of the sewerage system to the existing trunk sewer at Harlow and thence to Rye Meads Sewage Disposal Works. A scheme for this work is at present being prepared.

#### SHEERING MILL SEWAGE WORKS

The temporary scheme consisting of a new pumping station is nearing completion. This installation will pump sewage effluent over the River Stort into the main Sheering sewer and thence to Rye Meads Sewage Disposal Works. The sewage works will be abandoned when the connection is made which it is hoped will be made early in 1967.

## REFUSE COLLECTION AND DISPOSAL

Household refuse is collected weekly and is disposed of by controlled tipping at Harlow U.D.C. tip. Special arrangements are made in connection with trade refuse. Large articles are collected free of charge by the Council.
